♦ PROFESSIONAL SUMMARY

Versatile technology professional with experience spanning web development, Android application development, search engine optimisation, digital education, content creation and technology training.

Skilled in designing and developing websites and mobile applications, improving online visibility through technical and search engine optimisation, and creating digital learning solutions for students and professionals.

Combines technical knowledge with teaching, communication and content-development skills to build practical digital products and deliver technology-focused solutions. Passionate about innovation, digital education, software development and using technology to solve real-world problems.

♦ PROFESSIONAL HIGHLIGHTS

Web Development

Design and development of responsive websites, online platforms and digital services.

Android Application Development

Development of native Android applications for education, productivity, utilities and digital content.

Search Engine Optimisation

Technical SEO, on-site optimisation, indexing, search visibility and website performance improvement.

Educational Technology

Development of digital learning resources, educational applications and technology-based learning solutions.

Digital Content Creation

Creation of educational, technology and digital media content for websites, applications and online audiences.

♦ WORK EXPERIENCE

Senior Web Developer & SEO Specialist

April 2021 – Present

Digital Media & Technology Solutions · New York, NY, United States

- Develop and maintain responsive websites and digital platforms for organisations, businesses and online communities.
- Design and implement user-friendly website interfaces with a strong focus on performance, accessibility and usability.
- Plan and implement on-site, off-site and technical SEO strategies to improve website visibility and search engine performance.
- Conduct keyword research, website optimisation, indexing and technical SEO analysis.
- Manage website content, updates, troubleshooting, security improvements and ongoing technical maintenance.
- Analyse website performance and identify opportunities to improve traffic, engagement and user experience.

Android Application Developer

January 2018 – March 2021

Independent Technology Projects · New York, NY, United States

- Designed and developed native Android applications using Java and modern Android development tools.
- Built educational, productivity, utility and content-focused mobile applications for Android users.
- Implemented application interfaces, navigation systems, local data storage, media playback and user-focused features.
- Integrated APIs, advertising platforms and other third-party services where required.
- Tested applications, investigated technical problems and improved application stability and performance.
- Prepared Android applications for production release and maintained applications through subsequent updates.

Technology Educator & Digital Learning Specialist

2010 – 2017

Independent Education & Technology Projects · New York, NY, United States

- Delivered technology and digital-skills training to students, educators and other learners.
- Developed educational resources, digital learning materials and technology-based teaching solutions.
- Taught computer-related subjects and introduced learners to practical technology concepts.
- Created instructional content designed to make complex technical concepts easier to understand.
- Supported learners with computer applications, internet technologies and digital productivity tools.
- Combined teaching experience with practical technology development to create engaging and accessible learning experiences.
